

RAJENDRA VERMA

AI SOLUTION ARCHITECT | GENAI · LLM · AGENTIC AI | PRE-SALES SOLUTIONING

rajendrarajaramv@gmail.com | +91 700-0201-326 | linkedin.com/in/rajendrarajaramv | iamrajendraverma.github.io | Indore, India

PROFESSIONAL SUMMARY

AI Solution Architect and Sr. Technology Consultant with **10+ years** in solution architecture and technical consulting, including **18 months delivering hands-on Generative AI solutions**. Designs enterprise-scale AI architectures spanning **LLMs, Retrieval-Augmented Generation (RAG), agentic AI workflows and prompt engineering**, with production work on **Amazon Bedrock, Claude, OpenAI and Google Vertex AI**. Partners directly with enterprise clients to run technical discovery, assess existing stacks, evaluate technical and commercial trade-offs, and translate business challenges into viable AI solutions. Builds working prototypes and reusable architecture assets — including an award-winning host-agnostic **Model Context Protocol (MCP)** server adopted across three different AI hosts.

ALIGNMENT WITH THE ROLE

8+ Yrs Architecture	10+ years; consulting-titled roles since Jan 2020; architect-titled since Apr 2025
Hands-on GenAI	18 months of GenAI delivery (Apr 2025 – present)
LLM / RAG / Agentic	RAG pipelines, multi-model orchestration, MCP agentic tooling, prompt engineering strategies for enterprise clients
Enterprise AI Arch.	End-to-end AI solution design; API-first integration; serverless architectures on AWS and GCP
Cloud AI Ecosystems	AWS Amazon Bedrock (Converse & InvokeModel APIs, cross-region inference profiles, model access governance), Lambda, S3, IAM; Google Vertex AI
Technical Evaluation	LLM selection on cost, latency and capability; build-vs-buy evaluation; implementation roadmaps
Demos & PoCs	Built and presented MCP-based AI tooling prototype to judging panel — 2nd Prize; Meeting Maker LLM prototype
Reusable Accelerators	Host-agnostic MCP server — one tool contract consumed by Claude Desktop, Cursor and Grok with no client-specific code
Stakeholder Mgmt	Enterprise client engagement — opportunity identification, stack recommendation, delivery oversight
Mentoring	Mentors developers on AI/ML best practices, architecture and AI-assisted development
Education Domain	BenchPrep (standardised test prep & continuing education) and Intellizy LMS — multi-year delivery

AI / GENAI EXPERTISE

GenAI & LLMs	Claude (Anthropic), OpenAI GPT, Google Gemini, LLaMA; multi-model orchestration, model evaluation and selection
AI Patterns	Retrieval-Augmented Generation (RAG), agentic AI workflows, LLM chaining, tool use / function calling, semantic search
Agentic & Tooling	Model Context Protocol (MCP) client & server design, tool schemas, capability negotiation, LLM tool orchestration
Prompt Engineering	System prompts with explicit criteria, few-shot prompting, structured output via tool use and JSON schema, validation and retry loops
AI Solution Design	Requirements analysis, LLM selection criteria, cost-latency-capability trade-offs, implementation roadmaps, build-vs-buy
Cloud AI Platforms	Amazon Bedrock, Google Vertex AI, OpenAI API, Claude API
AI Frameworks	LangChain, Llamaindex, vector DBs (Pinecone, Weaviate), embedding models, OpenAI Whisper, TensorFlow
Applied Domains	Meeting transcription & summarisation, document intelligence, semantic search, healthcare AI, IoT intelligence

ARCHITECTURE & ENGINEERING SKILLS

Solution Arch.	Solution & application architecture, API-first design, enterprise integration patterns, technical design documents, framework selection
Cloud & Serverless	AWS (Lambda, EC2, ECS, API Gateway, S3, DynamoDB, RDS, SNS, SQS, IAM, CloudFront, CloudWatch, CodePipeline, IoT Core), GCP, Firebase
Languages	Python, Java, Kotlin, Dart (Flutter), C++
Backend & APIs	FastAPI, Flask, Ktor, RESTful API design & versioning, WebRTC, MQTT, payment gateway integration
Data	SQL & NoSQL, data modelling, SQLite, Room, Realm, Firebase Realtime DB
Security	HIPAA-compliant data handling, IAM & access-scoped credentials, secure BLE protocols
Delivery	Agile/Scrum facilitation, CI/CD, Git/GitHub, JUnit, Espresso, code review, mentoring
AI-Assisted Dev	Claude Code, GitHub Copilot, Cursor, spec-driven development

I PROFESSIONAL EXPERIENCE

Sr. Technology Consultant & AI/ML Solutions Architect

Apr 2025 – Present

Techment, Indore, India

- **AI solution architecture** — Design enterprise AI/ML solutions on Claude, OpenAI and Bedrock; evaluate platforms and recommend integration patterns against client requirements and budget
- **Client-facing solutioning** — Partner with enterprise clients to identify AI opportunities, run technical assessments of existing stacks, and architect end-to-end implementations aligned to business objectives
- **RAG & agentic workflows** — Architect Retrieval-Augmented Generation systems, prompt engineering strategies and multi-model AI workflows; design agentic tool-use patterns
- **Technical & commercial evaluation** — Assess LLM capabilities across Claude, GPT and open-source models on cost, latency and capability to recommend the right model per use case
- **Mentoring & enablement** — Facilitate agile ceremonies, mentor developers on AI/ML best practices and architecture, guide teams on AI-assisted development

Technology Consultant

Apr 2023 – Apr 2025

Techment, Indore, India

- Conducted **comprehensive technical assessments** of client systems; recommended solutions across cloud services, hardware and software architecture
- Delivered production-grade applications for multinational clients; architected modern solutions with Jetpack Compose and LiveData
- Maed code reviews and enforced **SOLID principles** and engineering standards across delivery teams

Sr. Software Engineer

Jun 2021 – Apr 2023

Techment, Indore, India

- Architected applications integrating **BLE 6.0** medical devices with secure communication protocols for healthcare clients
- Implemented HIPAA-aware data handling and optimised real-time data synchronisation workflows

Mobile Technology Consultant

Jan 2020 – Jun 2021

JSstech Alliance, Indore, India

- Delivered **15+ applications across 8+ countries** with multi-language localisation
- Implemented testing strategies **reducing bug reports by 40%**
- Integrated NVR/DVR camera SDKs, Google Maps, Firebase Analytics and multiple payment gateways

Sr. Android Developer

Jul 2016 – Dec 2019

Walkover · Codiant · Galaxy Web Links, Indore, India

- Led a development team delivering applications for subsidiary companies (MSG91, GIDDH, Space)
- Delivered **8+ enterprise projects** spanning marketplace, taxi aggregation and real-time communication platforms
- Built video/audio calling SDKs using **WebRTC**; delivered e-commerce, LMS and communication platforms

I AI PROJECTS & ACCELERATORS

CodeCompass — Host-Agnostic MCP Server **2ND PRIZE**

Reusable agentic AI tooling built on the Model Context Protocol client-server architecture

- Designed and built a **host-agnostic MCP server** exposing custom tools and resources — a **reusable accelerator**, not a one-off integration
- Achieved **cross-host compatibility from a single tool contract** — consumed by **Claude Desktop, Cursor and Grok** with no client-specific code
- Implemented the **MCP client** that discovers server capabilities and orchestrates tool calls through the LLM
- Architected the **client-server contract**: tool schemas, capability negotiation, request/response handling, transport layer
- **Developed and presented to a judging panel**, earning 2nd Prize among competing teams

Model Context Protocol · MCP Client/Server · LLM Tool Use · AI Agent Architecture

github.com/MsTechmentTechnology/Techment-Hackathon-Codecompass

Meeting Maker — LLM Document Intelligence Pipeline

Intelligent meeting transcription, analysis and note-generation system

- Built a full-stack application with a **Python/FastAPI backend** and Jetpack Compose frontend
- Integrated **LLM processing** (OpenAI and Gemini APIs) for automated meeting analysis and structured note generation
- Designed the transcription → analysis → structured-output pipeline, including prompt design and output validation

Python/FastAPI · LLM APIs · OpenAI Whisper · Ktor · MVVM

Enterprise RAG & LLM Advisory | Techment

Client-facing AI solution design

- Architected **RAG pipeline** designs for intelligent document processing and semantic search in enterprise applications
- Produced **LLM selection recommendations** comparing Claude and OpenAI on cost, latency and capability
- Defined prompt engineering strategies and multi-model orchestration patterns for client workloads

RAG · Vector DBs · Claude API · OpenAI API · Amazon Bedrock

EDUCATION-SECTOR DELIVERY

BenchPrep Learning Platform | Techment

Standardised test preparation and continuing education platform

- Spearheaded migration from legacy Android to **Jetpack Compose** with successful client delivery
- Architected **Kotlin Multiplatform (KMP)** transition for a unified iOS/Android codebase
- Delivered a **multi-flavour architecture** serving multiple client-branded builds from one codebase

Jetpack Compose · KMP · Kotlin · Java · REST APIs

Intellizy LMS | Content Delivery at Scale

Online education platform with video streaming and personalised engagement

- Built an HTML- and video-based **content delivery platform** with streaming playback
- Implemented a **personalised push notification system** driving learner re-engagement

Android · Video Streaming · Push Notifications · REST APIs

ADDITIONAL PLATFORM PROJECTS

WellDoc BlueStar | Digital Health Platform

Mobile health solution for chronic disease management

- **BLE 6.0** integration for secure medical device communication; **HIPAA-compliant** data handling and real-time patient data synchronisation

Kotlin · Jetpack Compose · BLE · Firebase · SQLite

E-Commerce Marketplace, Taxi Aggregation & IoT Control

Multi-vendor commerce, real-time dispatch, and MQTT device control

- **Multi-vendor marketplace** with independent seller catalogues, multiple payment gateways and order-state reconciliation
- **Two-sided real-time marketplace** with GPS dispatch, live tracking and trip lifecycle state management
- **MQTT-based** distributed device control with binary, delay and interval switching modes

REST APIs · Payment Gateways · Google Maps SDK · MQTT (paho) · Hilt DI

EDUCATION

Master of Computer Applications (MCA) | Manipal University, Jaipur | Nov 2025

Master of Science in Bioinformatics | DAVV University, Indore | Oct 2011

Bachelor of Science in Bioinformatics | DAVV University, Indore | Oct 2008

CERTIFICATIONS

Claude Certified Architect – Foundations | Anthropic | In Progress

Advanced AI and Machine Learning Techniques & Capstone | Microsoft | Jul 2025

Machine Learning Capstone | IBM | Jul 2025

Research Methodologies | Queen Mary University of London | Jul 2025

KEY ACHIEVEMENTS

AI & Solution Architecture

- Won **2nd Prize** for a **reusable MCP-based agentic AI accelerator**, developed and presented to a judging panel
- Delivered **cross-host AI tooling** from a single contract — one server, three independent AI hosts, zero client-specific code
- Architected **RAG pipelines** and LLM integrations for enterprise document processing and semantic search
- Evaluated and recommended **optimal LLM selection** for client use cases on cost, latency and capability

Delivery & Leadership

- Delivered **15+ production applications across 8+ countries** with multi-language support
- Reduced bug reports by **40%** through comprehensive automated testing strategies
- Led development teams and mentored engineers on architecture and AI-assisted development
- **5+ years at Techment** with progression from Sr. Engineer to Consultant to Solutions Architect
