

RAJENDRA VERMA

Solution Architect · Java | Python | AWS · Sr. Technology Consultant

rajendrarajaramv@gmail.com | 700-0201-326 | [linkedin.com/in/rajendrarajaramv](https://www.linkedin.com/in/rajendrarajaramv) | iamrajendraverma.github.io | Indore, India

PROFESSIONAL SUMMARY

Solution Architect and Sr. Technology Consultant with **10+ years** of full-stack engineering experience designing and delivering scalable, secure production systems across **e-commerce, healthcare, fintech and SaaS**. Experienced in end-to-end solution and application architecture — API-first design, enterprise integration patterns, technical design documentation, and framework and build-vs-buy evaluation. Hands-on across **Java, Kotlin and Python**, with breadth on **AWS** — Lambda, EC2, ECS, API Gateway, S3, DynamoDB, IAM, CloudWatch and Amazon Bedrock — partnering with enterprise clients to assess systems, recommend stacks and oversee implementation. Delivers in **Agile/Scrum** environments and mentors engineering teams.

ALIGNMENT WITH THE ROLE

REQUIREMENT	EVIDENCE
6+ years experience	10+ years — first role July 2016; 5+ years at Techment
Java / Python / AWS	Java and Kotlin (JVM) across 40+ production applications; Python with Flask and FastAPI; AWS across Lambda, EC2, ECS, API Gateway, S3, DynamoDB, IAM, CloudWatch and Amazon Bedrock
Solution & application architecture	End-to-end solution design; multi-flavour and Kotlin Multiplatform architectures; MCP client-server contract design
API architecture & integration patterns	REST API design and integration; payment gateways, NVR/DVR SDKs, WebRTC, MQTT, third-party SDKs
Security architecture	HIPAA-compliant data handling; secure BLE protocols; IAM and access-scoped cloud credentials
Performance engineering	Legacy modernisation with measured performance gains; 40% reduction in defects through automated testing
Retail / eCommerce domain	Multi-vendor eCommerce marketplace with payment integration; two-sided ride-hailing marketplace; multi-site store surveillance
Agile / Scrum	Facilitates agile ceremonies, sprint planning, estimation and code review
Stakeholder communication	Enterprise client consulting — opportunity assessment, stack recommendation, delivery oversight

CORE TECHNICAL SKILLS

Solution Architecture	Solution and application architecture, API-first design, enterprise integration patterns, technical design documents (system diagrams, data flow, API specifications), build-vs-buy and framework evaluation
-----------------------	--

Languages	Java, Kotlin, Python, Dart (Flutter), C++
AWS	Compute & serverless — Lambda, EC2, ECS, Elastic Beanstalk · API & integration — API Gateway, SNS, SQS · Storage & data — S3, DynamoDB, RDS · AI/ML — Amazon Bedrock (Converse & InvokeModel APIs, cross-region inference profiles, model access governance) · Identity & security — IAM users, roles, policies and scoped credentials · IoT — AWS IoT Core · Delivery & ops — CloudFront, CloudWatch, CodePipeline, Service Quotas, Billing & Cost Management
Other Cloud & Backend	Google Cloud Platform, Vertex AI, Firebase (Auth, Firestore, Realtime DB, Cloud Messaging), Flask, FastAPI, serverless architectures
APIs & Integration	RESTful API design and versioning, payment gateway integration, WebRTC, MQTT, Ktor, Retrofit, third-party SDK integration
Data	SQL and NoSQL, data modelling, SQLite, Room, Realm, Firebase Realtime Database
Security & Performance	HIPAA-compliant data handling, IAM and scoped credentials, secure BLE protocols, performance profiling and optimisation
AI / ML	Claude API, Amazon Bedrock, OpenAI, RAG pipelines, Model Context Protocol (MCP), prompt engineering, LLM evaluation and selection
Architecture Patterns	Clean Architecture, MVVM, MVP, client–server contract design, spec-driven development
Delivery & Quality	Agile/Scrum, CI/CD, Git and GitHub, JUnit, Espresso, code review, mentoring
Mobile	Jetpack Compose, Kotlin Multiplatform (KMP), Android SDK and NDK, Flutter, Material 3
IoT & Hardware	ESP8266, ESP32-C3, BLE 6.0, Zigbee, LoRa, Matter Protocol, Node-RED

PROFESSIONAL EXPERIENCE

Sr. Technology Consultant & AI/ML Solutions Architect

Techment, Indore, India

April 2025 – Present

- Solution architecture** — Design enterprise AI/ML solutions; evaluate platforms and recommend integration patterns aligned to client requirements and budget
- Client consulting** — Partner with enterprise clients to assess current tech stacks, identify opportunities and architect end-to-end implementations against business objectives
- Cloud and LLM integration** — Architect RAG systems and multi-model workflows; assess capability, cost and latency trade-offs across Claude, GPT and open-source models
- Technical leadership** — Facilitate agile ceremonies, mentor developers, lead code reviews and unblock complex engineering challenges
- Modernisation** — Lead application modernisation using Jetpack Compose and cross-platform KMP architecture

Technology Consultant

April 2023 – April 2025

Techment, Indore, India

- Conducted **technical assessments** of client systems and recommended solutions across cloud services, hardware and software architecture
- Delivered production-grade applications for multinational clients; architected modern solutions with Jetpack Compose and LiveData
- Revamped legacy applications to modern standards with measurable performance and user-experience improvements
- Managed code reviews, enforcing **SOLID principles** and engineering standards across teams

Sr. Software Engineer

June 2021 – April 2023

Techment, Indore, India

- Architected applications integrating **BLE 6.0** medical devices with secure communication protocols
- Optimised real-time data synchronisation and device pairing workflows

Mobile Technology Consultant

Jan 2020 – June 2021

JStech Alliance, Indore, India

- Delivered **15+ applications across 8+ countries** with multi-language localisation
- Integrated NVR and DVR camera SDKs with real-time video streaming for IoT surveillance
- Implemented testing strategies **reducing bug reports by 40%**
- Integrated Google Maps, Firebase Analytics and multiple payment gateways

Sr. Android Developer

July 2016 – Dec 2019

Walkover · Codiant · Galaxy Web Links — Indore, India

- Led a development team delivering applications for subsidiary companies (MSG91, GIDDH, Space)
- Delivered **8+ enterprise projects** spanning marketplace, taxi aggregation and real-time communication platforms
- Built video and audio calling SDKs using **WebRTC**; delivered e-commerce, LMS and communication platforms

RETAIL & COMMERCE PROJECTS

E-Commerce Marketplace — Multi-Vendor Retail Platform

Multi-vendor online marketplace with integrated payments and order management

- Architected a **multi-vendor marketplace** supporting independent seller catalogues, listings and order flows on a shared platform
- Integrated **multiple payment gateways** with secure transaction handling and order-state reconciliation
- Designed the **REST API integration layer** between client and backend commerce services
- Implemented catalogue, cart and checkout journeys optimised for low-bandwidth networks

Stack: Android, REST APIs, Payment Gateway SDKs, Firebase, SQLite · **Domain:** eCommerce platforms, omnichannel commerce, order management

Taxi Aggregation Platform — Real-Time Marketplace & Dispatch

GPS-enabled ride-hailing platform with live tracking and driver-rider matching

- Built a **two-sided marketplace** with real-time dispatch and supply-demand matching
- Implemented **GPS tracking and live location streaming** for in-flight order visibility
- Integrated payment processing and fare computation with trip lifecycle state management

Stack: Android, GPS/Location Services, Real-Time Messaging, Payment Integration, Google Maps SDK · **Domain:** real-time supply matching, fulfilment, logistics visibility

Risco Group NVR/DVR Surveillance Platform — Store & Site Operations

Real-time video surveillance with cloud integration for multi-site monitoring

- Integrated **NVR and DVR camera SDKs** for live and recorded streaming across distributed sites
- Implemented real-time streaming with cloud connectivity for remote multi-site monitoring

Stack: Android, NVR/DVR SDKs, Real-Time Video Streaming, Cloud Integration, IoT · **Domain:** store operations, loss prevention, multi-site estate monitoring

LMS Platform (Intellizy) & Chat Platform (Bizztalk)

Content delivery at scale, and real-time customer communication

- Built HTML and video content delivery with streaming playback and a **personalised push notification system** driving re-engagement
- Delivered a WhatsApp-comparable messaging platform with **WebRTC** audio and video calling, presence and cross-device synchronisation

Stack: Android, Video Streaming, Push Notifications, WebRTC, Firebase, REST APIs · **Domain:** customer engagement, personalised campaigns, loyalty communications

ARCHITECTURE & PLATFORM PROJECTS

Techment Hackathon CodeCompass — 2nd Prize

AI tooling platform built on Model Context Protocol (MCP) client-server architecture

- Designed a **host-agnostic MCP server** exposing custom tools and resources over a single contract
- Achieved **cross-host compatibility** — consumed by Claude Desktop, Cursor and Grok with no client-specific code
- Architected the **client-server contract**: tool schemas, capability negotiation, request and response handling, transport layer
- Presented the solution to judges, earning **2nd Prize** among competing teams

Stack: MCP Client/Server, LLM Tool Use, AI Agent Architecture · [Repository](#)

BenchPrep Learning Platform — Techment

Standardised test preparation and continuing education platform

- Spearheaded migration from legacy Android to **Jetpack Compose** with successful client delivery
- Architected **Kotlin Multiplatform (KMP)** transition for a unified iOS and Android codebase
- Modernised a legacy **Java REST API** codebase with the Material 3 design system

Stack: Jetpack Compose, KMP, Kotlin, Java, REST APIs, Multi-flavour Architecture

WellDoc BlueStar — Digital Health Platform

Mobile health solution for chronic disease management

- Developed **BLE 6.0** integration for secure medical device communication (glucometer, health monitors)
- Architected a **multi-flavour application** serving different healthcare client domains from one codebase
- Implemented **HIPAA-compliant** data handling and real-time patient data synchronisation

Stack: Kotlin, Jetpack Compose, BLE, Firebase, SQLite

Meeting Maker & ESP Buttons Control System

AI meeting intelligence, and serverless IoT device control

- Built a full-stack application with a **Python/FastAPI backend** and **LLM processing** for automated meeting analysis
- Architected an **MQTT-based** distributed device control system with binary, delay and interval switching modes

Stack: Python/FastAPI, LLM APIs, Ktor, MQTT (paho), Hilt DI, MVVM

EDUCATION

Master of Computer Applications (MCA)

Manipal University, Jaipur · Nov 2025

M.Sc. Bioinformatics

DAVV University, Indore · Oct 2011

B.Sc. Bioinformatics

DAVV University, Indore · Oct 2008

CERTIFICATIONS

Claude Certified Architect – Foundations

Anthropic · In progress

Advanced AI & Machine Learning Techniques

Microsoft · Jul 2025

Machine Learning Capstone

IBM · Jul 2025

Research Methodologies

Queen Mary University of London · Jul 2025

KEY ACHIEVEMENTS

- Delivered **15+ production applications across 8+ countries** with multi-language support
- **2nd Prize**, Techment Hackathon — MCP-based AI tooling platform (client/server architecture)
- Reduced bug reports by **40%** through comprehensive automated testing strategies
- Architected **RAG pipelines** and LLM integrations for enterprise document processing and semantic search
- Evaluated and recommended optimal LLM selection for client use cases on cost, latency and capability
- Led development teams and mentored engineers on architecture and AI-assisted development practices
